EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas M. Dimauro on 20 JULY 2006.

The application has been amended as follows:

IN THE CLAIMS

36 (Currently amended). An apparatus comprising a fluid retention chamber having an opening, and a manifold comprising:

- a) an output port adapted for attachment to a fluid retention chamber, the port having at least one opening,
- b) first and second input ports, each port adapted for attachment to a delivery syringe, each input port having an opening, and
- c) first and second tubes, each tube having a sterile inner surface, and entry and exit portions,
- d) a continuous base having an upper and a lower surface, wherein each port is located upon the base and extends upward from the upper surface, and
- e) first and second delivery syringes. each syringe having a bore. a syringe opening and a plunger contained within the bore,

Art Unit: 1723

wherein the syringe opening of each syringe is attached to the opening of the respective input port,

the entry portion of the first tube being in fluid communication with the opening of the first input port, the entry portion of the second tube being in fluid communication with the opening of the second input port,

the exit portion of each tube being in fluid communication with the at least one opening of the output port,

wherein each port opening has a centerpoint at the upper surface of the base,
wherein the three centerpoints define a triangle.

2. The following is an examiner's statement of reasons for allowance:

The closest prior art is to Whitmore 5674394. Absent the use of impermissible hindsight gleaned from the application, the claims are deemed distinguishing over the prior art whereby wherein each of the input port opening with an attached syringe and output port adapted for attachment to a fluid retention chamber has a respective centerpoint base upper surface and arranged to define a triangle configuration.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tony G. Soohoo whose telephone number is (571) 272 1147. The examiner can normally be reached on 7-5PM, Tue-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wanda Walker can be reached on 571-272-1151. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
